## Education

### University of South Florida

Aug 2022 - May 2026

*Bachelor of Science in Artificial Intelligence and Business Analytics*

*Tampa, FL*

*Bachelor of Science in Econometrics and Quantitative Economics*

*GPA: 3.98/4.0 | Summa Cum Laude*

**Relevant Coursework:** Applied Data Science, Data Mining, Statistical Programming, Big Data for AI & Analytics, Time Series & Forecasting, Data Visualization, Excel with Data Modeling, Strategic Management & Decision Making

## Experience

### Data Analyst Intern

Jun 2024 - Aug 2024

*Princeton University - Office of Finance and Treasury*

*Princeton, NJ*

- Cut reporting time from hours to **5** minutes by building a Power Automate workflow that processed **10,000+** rows, with the solution adopted by multiple teams
- Rebuilt row-level security for a **7M+** record Tableau extract using SQL to separate super-user and restricted-user access, improving load time by **80%** while preserving stakeholder access controls
- Designed an Excel template with VBA and Power Query to clean and standardize PeopleSoft Financials data, automating preparation of **200+** monthly employee records for the International Tax team
- Created a Generative AI guide covering practical finance use cases, prompting strategies, and workflow applications, adopted by 150+ staff across the office

### Data Analyst Intern

Jun 2023 - Aug 2023

*Intercontinental Shipping Co., Ltd.*

*Haiphong, Vietnam*

- Investigated discrepancies affecting **20%** of weekly shipments by reconciling customer, port, and internal records and working with shipping teams and customers to resolve data conflicts
- Validated and standardized monthly international shipping records using Excel functions and data cleaning techniques, reducing documentation errors by **25%** and improving data quality across export workflows

## Projects

### Soccer Analytics | Python, SQL, dlt, DuckDB, dbt, Streamlit, scikit-learn, Gemini API

Jun 2026 - Sep 2026

- Built an ELT pipeline with dlt, DuckDB, and dbt to transform European football API data into **12,000+** analysis-ready player-season records across 5 major leagues
- Standardized player performance using per-90 goals, assists, key passes, tackles, and successful dribbles, applying a 300-minute threshold and position standardization for cross-player comparisons
- Developed an interactive scouting application covering **4500+** players, combining player similarity search and AI-assisted explanations to help analysts interpret strengths, weaknesses, and performance trade-offs

### Data Jobs Market Analysis | Python, Snowflake, PostgreSQL, Power BI, Gemini API

Apr 2026 - Aug 2026

- Built an ETL pipeline to collect and standardize **5,500+** USAJOBS postings across **12** data-role categories, normalizing job titles, salaries, locations, employment types, and remote-work fields for analysis in PostgreSQL
- Implemented a Gemini-powered workflow to extract compliance, security-clearance, and financial-system requirements from unstructured job descriptions, validating each extracted signal against the original text before storing it for analysis
- Developed an interactive Power BI dashboard analyzing role demand, compensation, geography, and employment trends, identifying Data Specialist roles as **60.1%** of postings and comparing salary patterns across job categories

### Coupon Acceptance Prediction | Python, scikit-learn, MLflow, FastAPI, Docker, Streamlit

Oct 2025 - Nov 2025

- Analyzed **12,700+** coupon records and engineered behavioral, contextual, and route-based features to identify factors associated with coupon acceptance
- Optimized a Random Forest classifier using scikit-learn and hyperparameter tuning, estimating a **3.1%** reduction in coupon distribution costs versus untargeted distribution
- Tracked model experiments with MLflow and deployed the selected model through a Dockerized FastAPI backend integrated with a Streamlit application, maintaining consistent feature engineering from training through inference

## Technical Skills

**Languages:** Python, SQL, R, DAX, HTML

**Libraries:** pandas, NumPy, scikit-learn, Matplotlib, Seaborn, Streamlit

**Business Intelligence & Automation:** Excel, Tableau, Power BI, Qlik, Power Automate

**Data Management & Orchestration:** PostgreSQL, Snowflake, Databricks, DuckDB, Airflow, dbt

**Developer Tools:** Git, GitHub, VS Code, Jupyter Notebook, Google Colab, Docker

**Concepts:** Machine Learning, Feature Engineering, ETL/ELT, Data Modeling, A/B Testing, KPI Reporting

## Leadership

### Peer Leader

Aug 2024 - May 2025

*Corporate Mentor Program, University of South Florida*

*Tampa, FL*

- Strengthened mentorship outcomes for **12+** first-generation students through structured check-ins and support
- Co-led career development events for **120+** students, improving engagement and peer feedback processes
