Education

University of South Florida

Aug 2022 – May 2026

Bachelor of Science in Artificial Intelligence and Business Analytics

Tampa, FL

Bachelor of Science in Econometrics and Quantitative Economics

GPA:3.98/4.0 | Summa Cum Laude

Relevant Coursework: Applied Data Science, Data Mining, Statistical Programming for Business Analytics, Database Design, Big Data for AI & Analytics, Econometrics, Time Series & Forecasting, Data Visualization, Excel with Data Modeling

Experience

Data Analyst Intern

Jun 2024 - Aug 2024

Princeton University - Office of Finance and Treasury

Princeton, NJ

- Restructured Row-Level Security on a **7M+** record data warehouse extract with a UNION ALL SQL architecture, improving Tableau load time by **80%** and restoring access controls for cross-functional stakeholders
- Cut reporting time from hours to **5 minutes** by building a Power Automate workflow that processed **10K+** rows and automated personalized email delivery with PDF attachments
- Designed an Excel template with VBA and Power Query to clean and standardize PeopleSoft Financials data for the International Tax team, automating **200+** monthly employee record cleanses
- Developed a Generative AI usage guide adopted by **150+** finance staff, standardizing prompt engineering practices for workflow automation and data quality

Data Analyst Intern

Jun 2023 - Aug 2023

Intercontinental Shipping Co., Ltd.

Haiphong, Vietnam

- Validated and standardized monthly international shipping records using advanced Excel functions and data cleaning techniques, reducing documentation errors by **25%** and improving data quality across export workflows
- Diagnosed root-cause discrepancies on **20%** of weekly shipments by reconciling data across customer, port, and internal systems, resolving each case directly with the shipping team and customers

Projects

Coupon Acceptance Prediction | *pandas, numpy, matplotlib, seaborn, scikit-learn*

Oct 2025 - Nov 2025

- Architected a data processing pipeline using pandas, numpy, and scikit-learn to perform automated data cleaning, missing value imputation, and feature engineering on **13K** raw records
- Performed exploratory data analysis (EDA) using Matplotlib and Seaborn to quantify how time of day, weather, distance, and coupon type influenced acceptance rates, surfacing the behavioral patterns that drove model feature selection
- Trained a recall-optimized Random Forest classifier to prioritize capturing likely accepters, reducing estimated coupon distribution cost by **3.1%** compared to untargeted baseline distribution

Data Jobs Market Analysis | *pandas, numpy, regex, Snowflake, Power BI*

Jul 2025 - Aug 2025

- Engineered an ETL pipeline to centralize **10K+** job postings into a Snowflake data warehouse, converting unstructured text into a queryable relational schema
- Processed postings using pandas and regex for text cleaning, normalization, and keyword extraction to surface skill-related terms from unstructured job descriptions
- Designed a Power BI dashboard mapping the data job landscape across roles and industries, revealing that Data Analyst roles accounted for **33.5%** of postings and identifying the most critical industry-standard tools for job seekers

Flight Cancellation Risk Modeling | *PostgreSQL, pandas, numpy, scikit-learn*

Jun 2025 - Aug 2025

- Built an end-to-end ETL pipeline to ingest, clean, and structure **2.5M+** flight records into PostgreSQL, engineering features around weather patterns, routes, and scheduling to support downstream predictive modeling
- Trained and tuned an XGBoost classifier with SMOTE to address severe class imbalance in rare cancellation events, improving minority-class F1 score by **0.30** and making predictions actionable for rebooking decisions

Technical Skills

Languages: Python, SQL, R, DAX, HTML

Business Intelligence & Automation: Excel, Tableau, Power BI, Qlik, Power Automate

Analytics Libraries: pandas, NumPy, Matplotlib, Seaborn, scikit-learn

Data Management & Orchestration: PostgreSQL, Snowflake, BigQuery, Oracle, DuckDB, MongoDB, Airflow, dbt

Developer Tools: Git, GitHub, VS Code, Jupyter Notebook, Google Colab

Concepts: Machine Learning, ETL/ELT, Data Modeling, Data Cleaning, A/B Testing, KPI Reporting

Certifications: Google Data Analytics Professional Certificate, USF Muma Citizen Data Science

Leadership

Peer Leader

Aug 2024 - May 2025

Corporate Mentor Program, University of South Florida

Tampa, FL

- Strengthened mentorship outcomes for **12+** first-generation students through structured check-ins and support
- Co-led career development events for **120+** students, improving engagement and peer feedback processes
