EDUCATION

University of South Florida

Expected May 2026

Bachelor of Science in Artificial Intelligence and Business Analytics

Tampa, FL

Bachelor of Science in Econometrics and Quantitative Economics

GPA: 3.98

Relevant Coursework: Applied Data Science, Data Mining, Big Data Analytics, Time Series Analysis, Intro to Econometrics, Statistical Programming for Business Analytics, Excel with Data Modeling for Business Analytics

EXPERIENCE

Data Engineering Intern

Jun 2024 – Aug 2024

Princeton University - Office of Finance and Treasury

Princeton, NJ

- Optimized Tableau dashboard performance by **80%** for **7M+** records by refactoring SQL queries and implementing a custom UNION ALL architecture to maintain Row-Level Security in data extracts
- Slashed reporting time from hours to **5 minutes** by architecting a Power Automate pipeline that parsed **10K+** rows, grouped data by recipient, and automated personalized email delivery with PDF body attachments
- Collaborated with the International Tax team to translate complex regulatory requirements into technical logic and developed a VBA/Power Query template to automate **200+** monthly employee record cleanses
- Authored a Generative AI usage guide for **150+** staff to standardize prompt engineering for financial workflow automation and internal data protocols

Data Analyst Intern

Jun 2023 – Aug 2023

Intercontinental Shipping Co., Ltd.

Haiphong, Vietnam

- Validated and standardized international shipping records using Excel functions, improving data accuracy and reducing documentation errors by **25%**
- Conducted a comprehensive analysis of shipment records to isolate process bottlenecks, contributing to a **20%** increase in operational efficiency for export deal closures

PROJECTS

Coupon Acceptance Prediction | *pandas, numpy, matplotlib, seaborn, scikit-learn*

Oct 2025 – Nov 2025

- Architected an end-to-end data processing pipeline using Python to perform automated data cleaning, missing value imputation, and feature engineering on **13K** raw records to prepare a high-fidelity dataset for predictive modeling
- Executed high-dimensional EDA using Matplotlib and Seaborn to quantify the statistical influence of environmental factors and customer demographics on coupon acceptance behavior within a simulated delivery network
- Designed a Random Forest classifier with recall optimization to prioritize capturing likely coupon users, reducing coupon distribution cost by **\$500** and improving targeting efficiency over untargeted approaches

Data Jobs Market Analysis | *pandas, numpy, regex, Snowflake, Power BI*

Jul 2025 – Aug 2025

- Engineered a Python-based ETL pipeline to centralize **10K+** job postings into a Snowflake data warehouse, converting unstructured text into a queryable relational schema
- Processed postings using pandas and regex for text cleaning, normalization, and keyword extraction to surface skill-related terms from unstructured job descriptions
- Built a Power BI dashboard mapping the data job landscape, quantifying a 33.5% market share for Data Analysts and pinpointing the most critical industry-standard tools

Flight Cancellation Risk Modeling | *PostgreSQL, pandas, numpy, scikit-learn*

Jun 2025 – Aug 2025

- Designed a scalable data ingestion pipeline to load and structure **2.5M+** flight records into PostgreSQL for efficient querying and downstream analytics
- Trained and tuned an XGBoost classifier to predict flight cancellations, applying SMOTE to address class imbalance and improving rare-event detection performance by **30%**

TECHNICAL SKILLS

Languages: Python, SQL, R, HTML

Analytics & BI Tools: Tableau, Power BI, Power Automate, Visio, Excel

Data Engineering: PostgreSQL, SQL Server, MySQL, Snowflake, BigQuery, Oracle, MongoDB, Airflow, dbt

Concepts: A/B Testing, Feature Engineering, Data Modeling, Non-relational Databases, ETL/ELT

Certifications: Google Data Analytics Professional Certificate, USF Muma Citizen Data Science

LEADERSHIP

Peer Leader

Aug 2024 – May 2025

Corporate Mentor Program, University of South Florida

Tampa, FL

- Strengthened mentorship outcomes for **12+** first-generation students through structured check-ins and support
- Co-led career development events for **120+** students, improving engagement and peer feedback processes
